NANO **wave** 

"get your wave on!"

RESPIRATORY MASK

Nano Wave is uniquely designed with the latest in innovative technology which includes advanced Nano Foam, a multi-layered filtration system, improved overall structure and nose clip for additional support as well as a state of the art breathe easy filtration system. The innovative technology used in the design and construction of our Nano Wave ensures that the mask is re-usable for 30 days, provides enhanced protection against viral and bacterial transmissions due to its unique 5 layer filtration system and superior comfort through the masks inherent contour fitting and breathability. Thereby ensuring that our valued clients are guaranteed increased protection, comfortability and durability whilst wearing their mask.

We have also extended our colour range to Black, Grey, Light Blue, Teal and Pink.

ASSIST IN THE REDUCTION OF FOG
UP OF GLASSES

VENTILATION FOR EASIER BREATHING

COMFORTABLE BREATHABLE MATERIAL
FOR LONGER WEAR

CONTOUR FITTING AND EASY FIT EAR PIECES

FIVE LAYER FILTERED VALVE

THE TECHNOLOGY

HOW DOES IT WORK

The NanoWave consists of an outer and inner layer of special proprietary housing construct. This provides increased filtration and enhances the contour fit. The improved design aims to provide maximum protection and durability.

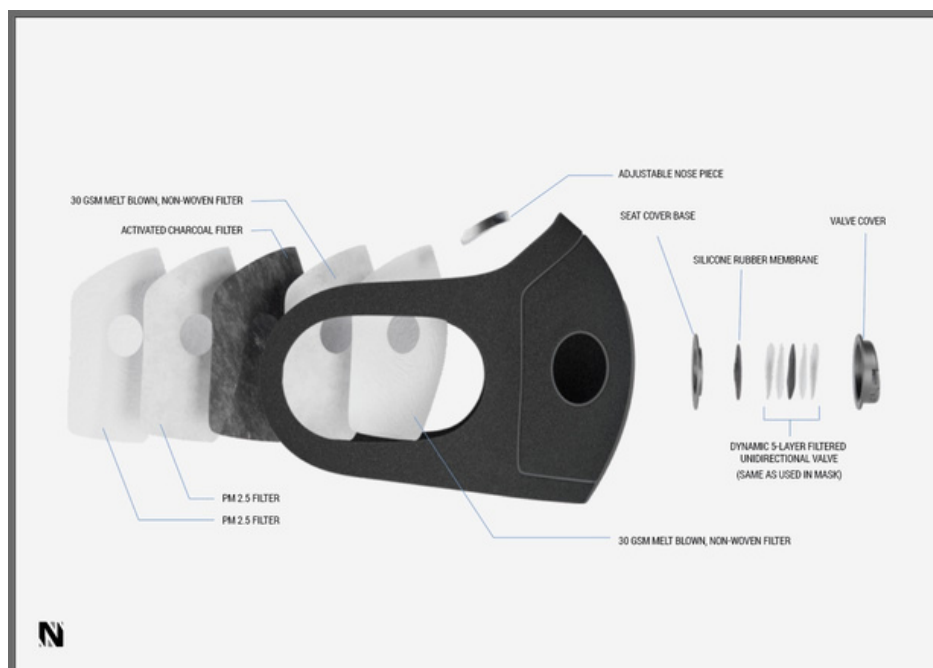

The NanoWave is hand washable and will serve as a cost-effective method in efforts to self-protect. The NanoWave has been designed to provide all the benefits of version one whilst encapsulating evolution in every way.

FIVE LAYER FILTERED AIR VALVE

The one way air valve has been designed to increase protection. The NanoWave can be worn for longer periods, lowering the rise in body temperatures. The unique air valve allows for increased ventilation.

There is a five layered filter within the valve for increased protection. The five layered filter consists of 2 x 30gsm melt blown, non-woven filter, 2 x PM 2.5 filters and 1 x activated charcoal filter

FIVE LAYERED FILTER MELTBLOWN

Nano Wave V2 five-layered Filter consists of:

- **2 x 30gsm melt blown, non-woven filters**
- **2 x PM 2.5 filters**
- **1 x Activated charcoal filter**

The Nano Wave's innovative filtration system is 100% washable and reusable. Uniquely providing protection to the wearer from viral and bacterial infection.

NANO wave

JUNIOR

We believe in simplicity and comfort. Bearing in mind the nature of our little ones, the NanoWave Junior has been tailor made to fit and protect our little ones. This reusable mask comes in four trendy colours black, grey, blue & pink.

Fully equipped with Nano Foam technology, the easy wearing masks is hand washable and reusable for 30 days. The Breathe-Easy air filtration system ensures that children will experience optimal comfort while going through their daily routines.

The broad ear bands allow for kiddies to feel at ease and create maximum comfort. Following in the footsteps of the parent NanoWave, we have taken the necessary steps to ensure that our junior range provides equal customer satisfaction.

T H E N A N O W A V E S U C C E S S S T O R Y

The Nano Wave is soaring in success and has taken the mask industry by storm. From online sales to the front lines of leading retailers, the Nano Wave is available nation wide in 150 Dischem stores, PNA, Shoprite Holdings pharmacies and selected Spars, in South Africa. The mask is also available in selected Pick n Pay and Spar stores in Swaziland. The Nano Wave has become the market leader in reusable masks. The expansion and growth of this brand has become a national phenomenon, with an increased reach in countries around the world. With the likes of front runner celebrities enhancing its endorsements, the Nano Wave is a sure one to watch.
